DETAILED ACTION

Response to Arguments

1 Applicant's arguments, see amendment, filed 17 January 2006, with respect to claims 4 and 16 have been fully considered and are persuasive. The §102(b) rejection of claims 4, 9, 10, 16 and 18 has been withdrawn.

Applicant's arguments, see amendment, filed 17 January 2006, with respect to claims 4 and 16 have been fully considered and are persuasive. The §103(a) rejection of claims 5, 6 and 15 has been withdrawn.

Allowable Subject Matter

2 Claims 4-22 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 4 recites, in part, "a rate limiter having an input receiving the speed signal and an output producing a rate limited speed signal; and an envelope filter having an input receiving the rate limited speed signal and an output producing a filtered and rate limited speed signal". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 5-15 depend from claim 4.

Claim 16 recites, in part, "rate limiting the speed signal to produce a rate limited speed signal; and envelope filtering the rate limited speed signal to produce an envelope filtered and rate limited speed signal". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 17-22 depend from claim 16.

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
